Awareness is characterized by contact, by sensing, by excitement and by gestalt formation. For awareness, being fully in contact with the reality is indispensable. Sensing determines the nature of awareness: whether distant (e.g. vision or sound), close (e.g. touch) or internal (e.g. muscular sensations or mental phenomena such as dreams and ...

my subjects, rather than perceiving imperfections, their age empowers them. It gives them freedom to realize who they want to be."

8 Artists Who Explore The Beauty Of The Aging Body | HuffPost

Gestalt Psychology Definition. Gestalt psychology is a school of thought that aims to determine the nature of a "gestalten" (an organised whole). It suggests that the whole is not a simple addition of its component parts but has characteristics of its own "determined by the intrinsic nature of the whole" (Wertheimer, 1925).
