Normal sperm have an oval head with a long tail. Abnormal sperm have head or tail defects — such as a large or misshapen head or a crooked or double tail. These defects might affect the ability of the sperm to reach and penetrate an egg. However, having a large percentage of misshapen sperm isn't uncommon. Typically, only around 4% to 10% of the sperm in a semen sample are normal, meaning that the vast majority don't look perfect under the microscope.
