A suggested curriculum could be structured so that the knowledge of pharmacology is acquired alongside the development of the skills for applying that knowledge in the therapeutic management of a patient. This should support the development from acquisition of knowledge and skills to the behavior of prescribing in clinical practice.

Teaching safe prescribing to medical students ...

Prescribing for the first time is a nerve-racking experience. Of all the tasks performed by new doctors, it is probably the one with greatest direct impact on the wellbeing of patients. Safe and effective practice rests on a good understanding of both clinical pharmacology and practical prescribing. Acquiring this is not easy, particularly when faced with reams of information about hundreds of unfamiliar drugs, often presented in a way that appears detached from clinical reality.
