temperature (hot summers and cold winters). They tend to occur in the middle latitudes (40 to 55 north), where prevailing winds blow overland, and temperatures are not moderated by bodies of water such as oceans or seas. Continental climates occur mostly in the Northern Hemisphere, which has the kind of large landmasses on ...

Continental climate - Wikipedia

Coastal regions have a smaller range in temperature than continental interiors because their temperature is determined by the the temperature of sea water. Coastal regions have salty water therefore, water remains cool and when the cool breezes from water reaches the coastal regions, they become cool as well.

Coastal regions have a smaller range of temperature than

Earth Science Labs - RMARINA - Google Sites

I want plenty of summer days at 30+ C/86+ F, but I think I'd be safe with "coastal" if it's less than 30 degrees from the equator. Continental wouldn't be bad either, provided it's south of the 37th parallel in North America, or probably less than 40 degrees from the equator elsewhere.

Continental or coastal? (climate, snowfall, hot, warm ...

Daily high temperatures range from 70 to 80 °F (21 to 27 °C) in the summer to 50 to 65 °F (10 to 16 °C) in winter, with low temperatures from the 60 °F (16 °C)s in summer to the mid 40s F in winter. Like most Mediterranean climates, much of coastal California has a wet winter and dry summer.
