Dec 31, 2014. In Design Secrets of the World's Best e-Government Web Sites, the Asia-Pacific online communications powerhouse FutureGov singles out eight national e-government portals as the best-designed in the world, and identifies the best practices these sites exemplify. "Ultimately, these websites are the best in the world because they are designed to be practical, simple, quick and adaptable," writes Joshua Chambers, editor of FirstGov Digital.

The Best E-gov Websites in the World - Digital.gov

E-government (short for electronic government) is the use of technological communications devices, such as computers and the Internet to provide public services to citizens and other persons in a country or region. E-government offers new opportunities for more direct and convenient citizen access to government, and for government provision of services directly to citizens.

E-government - Wikipedia

During the Internet boom of the late 1990s, government entities raced to develop Web sites, and high levels of e-government spending became the norm. Spending on e-government-related initiatives has continued to grow—indeed, in 2009, the US government is expected to spend more than \$71 billion on IT, of which an estimated 10 percent will be ...

E-government 2.0 | McKinsey

Easy access to government online has gone from being nice-to-have to being necessary in the open government era, with many government websites taking advantage of modern designs and technologies to help do the trick. All too often, local, state and federal governments and government agencies do far too little to reach out to citizens on the web. Many governments and agencies are stuck in the ...
