E Mail What It Is

e-mail (electronic mail or email): E-mail (electronic mail) is the exchange of computer-stored messages by telecommunication. (Some publications spell it email ; we prefer the currently more established spelling of e-mail .) E-mail messages are usually encoded in ASCII text. However, you can also send non-text files, such as graphic images and ...

What is Email (Electronic Mail)?

Short for electronic mail, e-mail or email is information stored on a computer that is exchanged between two users over telecommunications. More plainly, e-mail is a message that may contain text, files, images, or other attachments sent through a network to a specified individual or group of individuals.

What is E-mail? - Computer Hope

Electronic mail (email or e-mail) is a method of exchanging messages ("mail") between people using electronic devices. Email entered limited use in the 1960s, but users could only send to users of the same computer, and some early email systems required the author and the recipient to both be online simultaneously, similar to instant messaging. Ray Tomlinson is credited as the inventor of email ...

Email - Wikipedia

Electronic mail, commonly known as email, is a digital message between two or more people. Instead of using a pen to write a letter on paper, people use a keyboard (or sometimes their voice) to write out a message on an electronic device such as a smartphone or computer.
