The BD FACSCanto II provides the ultimate in flexibility and can be configured with two or three lasers to detect up to eight colors. The BD FACSCanto II features many innovations. At the heart of the cytometer, for example, the fluidics system features a fixed alignment flow cell to minimize startup time and improve reproducibility.

BD FACSCanto II

Safety Considerations The BD FACSCanto II uses two enclosed lasers for sample analysis. These can be hazardous if users look into the laser beam. Do not attempt to dismantle or adjust the laser hardware in any way. Primary human cells, taken directly from patients, are considered a BSL level II biohazard.
