### TABLE - 1 - A leader in aluminium and copper - Hindalco

The busbar conductors may be of aluminium or copper. The use of copper may be more appropriate at corrosive areas (such as humid, saline or chemically aggressive locations). In humid and corrosive conditions, aluminium erodes faster than copper. These solid or hollow conductors connect the supply side to the receiving end and are called bus ducts.

### Part V - Electrical Engineering Book

Aluminum has less than one-third the density of copper and, making allowance for conductivity, an aluminum bus bar will weigh about half as much as copper for equal conductance. For large installations requiring millions of pounds of metal, bus system designers have used the low cost of aluminum as the basis for optimum economic cur
