Plant Physiology by Taiz and Zeiger is a classic book which presents the basics of the field in a splendid and comprehensive manner. The current edition is a continuation of the original text I had used in the early 1990s. The text is a wonderful blend of plant structure and function with the fundamentals of the physiological

Extensive studies in tobacco (*Nicotiana tabacum*, an herbaceous plant) have demonstrated that floral evocation requires the apical bud to pass through two developmental stages (Web Figure 20.4.A). One stage is the acquisition of competence. A bud is said to be competent if it is able to flower when given the appropriate developmental
