equipment

**Task analysis -  
Wikipedia**

Task analysis is the  
process of learning  
about ordinary users  
by observing them in  
action to understand in  
detail how they  
perform their tasks and  
achieve their intended  
goals.

Population

**Task Analysis An  
Individual, Group,  
and Population ...**

Task analysis is the  
process of breaking a  
skill into smaller, more  
manageable steps in  
order to teach the skill.

Other practices, such  
as reinforcement,  
video modeling, or  
time delay, should be  
used to facilitate  
learning of the smaller  
steps.

File Type PDF  
Task Analysis An  
Individual And

**Evidence-Based  
Practice Brief: Task  
Analysis**

A task analysis is an evaluation of people doing a task, the environments in which they work, the physical and mental actions they perform, and the resources necessary to complete the task.

What environmental factors should be evaluated? Both the physical and

File Type PDF  
Task Analysis An

organizational  
environments should  
be evaluated.  
Approach Second

**How to Perform a  
Task Analysis -  
Online Training**

Task analysis is a  
method of breaking a  
piece of work down  
into smaller elements  
and examining the  
relationships between  
the elements (Gillan,  
2012). Task analyses  
organize information  
about the work
