Rihanna - Love On The Brain

The Brain on Love Helen Fisher: The Brain in Love Fisher also notes that other parts of the reward system, like the one that activates when you’re eating chocolate, plays a role during this phase of love. She supports the hypothesis that like chocolate, being head over heels in love is addictive.

Your Brain in Love - BrainHQ from Posit Science

Those who had been madly in love for a longer period of time—from eight to 17 months—showed additional activity in a brain region linked with feelings of deep attachment. That vividly showed us the brain can easily fall happily and madly in love rapidly, but feelings of deep attachment take time.” - Nautilus

The Brain Science Of Being In Love - ArtsJournal

Quotes from Your Brain on Lov... “many abuse victims don’t wish to let their abusers move onto the next victim after terrorizing them, because they fear that the next person might be treated better, thereby confirming their own sense of worthlessness that was instilled by the abuser in the first place.
